REOXlife POTENT

Essential 2 System

Potent Essential 2 System is an essence of life and health protection. It contains the highest quality standards of propriety formulation, with the latest innovative system from Japan. Together, it produces a synergistic effect that no other supplement has ever accomplished. Potent Essential 2 System is the solution to enhance and support your daily life activity.

With the collaboration with Unilife Japan, Return Legacy proudly presents to you Potent Essential 2 System. Potent Essential 2 System is exclusively formulated by the founder of MMNT, Professor Tsuchiya Masahiko. The main objective of Essential 2 System is to provide therapeutic nutrient that empowers us to gain a balance in body protection and beauty wellness.

The name Potent Essential 2 System is derives from the double-tract activity of propriety formulation in MMNT, and its natural ingredients that provide a well balance in protecting your inner and outer body.

System I: Defences System

Potent is an ideal supplement that enhances your defence mechanism, it is an effective free radical scavenger that supports internal protection. This unique supplement replenishes your body with anti-oxidant and restores your natural self-production of anti-oxidant to prevent oxidative stress.

System II: Skin Nutrient System

Skin Nutrient system is designed to improve your outer skin health and appearance. A fusion of nutrition and cosmetic care known as nutricosmestic. It supports the structure and function of the skin by nourishing internal health to provide external beauty.

POTENT 2 ESSENTIAL system

POTENT 2 ESSENTIAL system

Potent contains high dissolved hydrogen (DH) the smallest molecule of anti-oxidant in existence. Other antioxidant such as vitamin C or vitamin E has larger molecules compared to (DH) and large number of them will be damaged by stomach acids and digestive enzymes. While (DH) is so small that it is able to diffuse rapidly in tissues and cells and easily penetrate into skin.

Defences System

- ENHANCE CELLULAR PROTECTION**
- Improves body immune system.
- ENHANCE ANTI-OXIDANT PRODUCTION**
- Increases self-production of anti-oxidants to scavenge free radicals.
- REVERSE OXIDATION**
- Slow down aging
- MICRO CLUSTER**
- Helps to minimise the molecular bundle to enhance absorption
- DETOXIFICATION**
- Helps to neutralise harmful chemical.

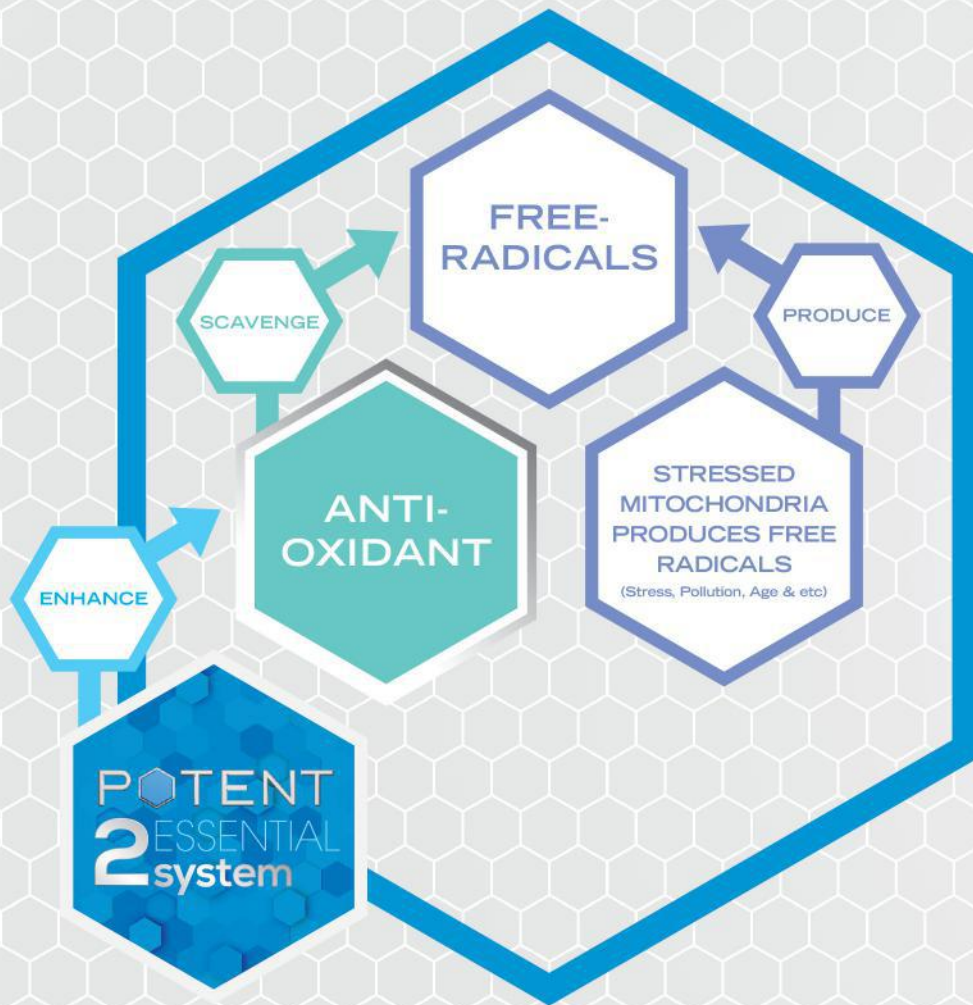

Skin Nutrient System

- CELL RENEWAL**
- Stimulates cell renew for wrinkle reduction, smoother and radiant skin.
- ANTI-INFLAMMATORY**
- Helps to reduce skin irritation and enhance soothing properties.
- PROTECT FROM ENVIRONMENTAL AGING**
- Protecting skin from UV rays exposure, toxins and pollution by providing anti-oxidant to accelerate skin recovery.
- DELAY AGING**
- Prevents skin from Hormonal and Genetic aging that lead by decreasing of collagen.

Picture shows relative sizes of Anti-oxidants:

Picture shows the process of Potent Essential 2 System neutralising free radicals.

Potent Essential 2 System will boost your internal and external protection, which will super-charge your health by gradually increase your immune system, delaying aging and enhance production of anti-oxidant to scavenge free radicals. Potent Essential 2 System will help you to maintain an optimum health and youthful vitality.

Potent Essential 2 System is your guardian of body immune system and your number one primary anti-oxidant supplement.

INFORMATION CORNER:

What is Oxidative Stress?

It has been defined as harmful effects because of the excessive production of free radicals, resulting in oxidative stress and attack biological cells.

What are free radicals?

Free radical is an oxygen containing unpaired electrons, making it highly reactive. Free radicals can chemically interact with cell components and steal their electrons in order to become stabilise, therefore triggering a large chain of free radical reactions.

What are antioxidants?

Antioxidants are natural substances that may prevent or delay cell damage by scavenging free radicals.

Damaged caused by oxidative stress

Oxidative stress leads to diseases such as Parkinson's disease and Alzheimer's disease, gene mutations and cancers, chronic fatigue syndrome, fragile X syndrome, heart and blood vessel disorders, atherosclerosis, heart failure, heart attack and inflammatory diseases.
